Section D (Case Study Based Questions)

8. Read the following passage and answer the questions:
We have shared our land with the past generations and will have to do so with the future generations too. Ninety five per cent of our basic needs for food, shelter and clothing are obtained from land.

Human activities have not only brought about degradation of land but have also aggravated the pace of natural forces to cause damage to land. Some human activities such as deforestation, overgrazing, mining and quarrying too have contributed significantly in land degradation. Mining sites are abandoned, after excavation work is complete, leaving deep scars and traces of over burdening. In states like Jharkhand, Chhattisgarh, Madhya Pradesh and Odisha, deforestation due to mining have caused severe land degradation. In states like Gujarat, Rajasthan, Madhya Pradesh and Maharashtra, over-grazing is one of the main reasons for land degradation. In the states like Punjab, Haryana, Western Uttar Pradesh over irrigation is responsible for land degradation due to water logging leading to increase in salinity and alkalinity in the soil.

Q 1. How does human activities have brought about land degradation? (1)

Q 2. How is over irrigation responsible for land degradation? (1)

Q 3. Why is human considered as the main culprit for land degradation? (2)

Section E (Long Answer Type Questions) (5×1=5)

9.Describe any five measures which were introduced by the French Revolutionaries to create a sense of collective identity amongst the French people.
