DELHI PUBLIC SCHOOL JANKIPURAM, LUCKNOW

SESSION 2025 - 2026 : WORKSHEET - 2

SUBJECT - SCIENCE - 086 (BIOLOGY)

CHAPTER: 2 – CONTROL AND COORDINATION

Date :_____ Name :_____ Class/Sec X/

Q1. Multiple Choice Questions:

1. Which hormone inhibits the hormone, insulin and glucagon?

   (a) somatostatin (b) thyroxine (c) calcitonin (d) vasopressin

2. Deficiency of ADH causes:

   (a) Diabetes insipidus (b) diabetes mellitus (c) dwarfism (d) gigantism

3. Hypersecretion of thyroxine causes:
   (a) Grave's disease (b) Exophthalmic goitre (c) both a and b (d) Myxoedema

4. Which hormone regulates uterine contractions?

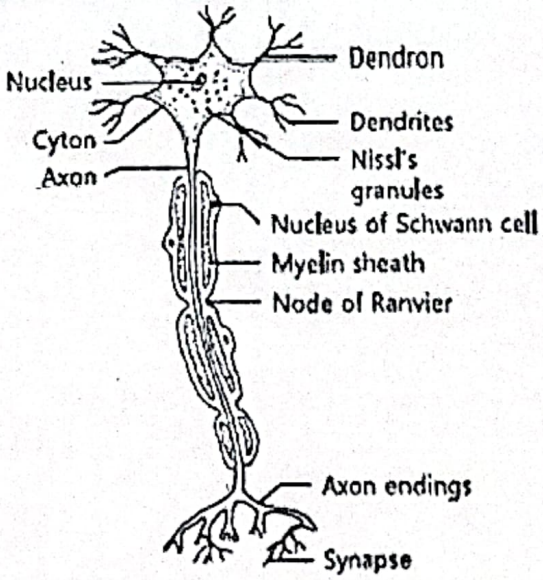
   (a) vasopressin (b) oxytocin (c) prolactin (d) thyroxine

5. Concentration of urine depends upon the presence of

   (a) Thyroxine (b) ADH (c) insulin (d) melatonin

6. The part of the brain responsible for thinking, memory, and reasoning is called the:
   (a) Medulla oblongata (b) Cerebrum (c) Cerebellum (d) Hypothalamus

7. Following diagram show the structure of a neuron.



Through which part of neuron information travels as an electrical impulse?
(a) Nucleus (b) Dendrite (c) Axon (d) Cyton

Q2. Assertion-Reason type questions:

For question numbers 1 and 2, two statements are given - one labelled **Assertion (A)** and the other labelled **Reason (R)**. Select the correct answer to these questions from the codes (a), (b), (c) and (d) as given below:
(a) Both A and R are true, and R is correct explanation of the assertion.
(b) Both A and R are true, but R is not the correct explanation of the assertion.
(c) A is true, but R is false. (d) A is false, but R is true.

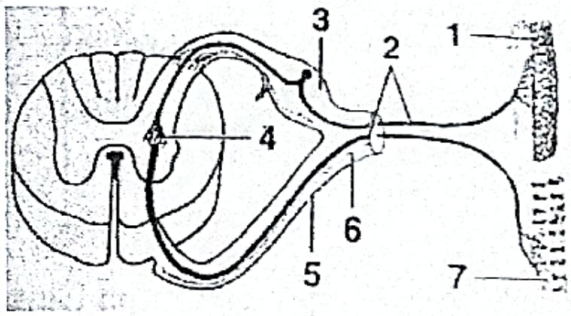
1. Assertion: Seismonastic movement shown by *Mimosa pudica* plant.
Reason: It is due to change in turgidity of cells of pulvinus.

2. Assertion: Blood pressure, salivation and vomiting are controlled by the medulla in the hind brain.
Reason: Vertebral column or backbone protects the spinal cord.

Q3. Complete the following table with appropriate words:

Gland	Secretion	Functions/Effect on body
	Testosterone	
Adrenal		In emergency increasing heartbeat
		Controls calcium and phosphorus balance in blood
	Growth hormone	

Q4. Diagram based study:



(i) Label parts numbered 1 to 7.
(ii) What physiological function it represents?
(iii) Give the path of nerve impulses.
(iv) Give two examples of this phenomenon.

Q5. Differentiate between the followings:

(i) Tropic and nastic movements

Q6. Answer the followings:

(i) Why is the use of iodised salt advisable?

(ii) Name one olfactory and one gustatory receptor present in human beings.

(iii) Name the neurotransmitter released by neurons.

(iv) Mention the function of abscisic acid.

(v) Name the part of brain that maintains balance.
